adventure / friendship / enterprise

with *spirit*

We do this for the pros and enthusiasts who share our passion for adventure and who subscribe to the true meaning of companionship; when it counts, on the water (and again, over a drink and a story on dry land). We spent two years redesigning our lifejackets with friends in mind. All of you.

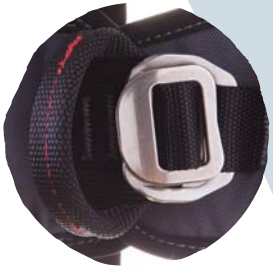
Freedom

Our new ***Contour*** range hugs the shape of your body for our least restrictive wearing experience. You'll look good and you'll forget you're wearing a lifejacket until you need it.

Safety

The only lifejacket manufacturer in the world today* tackling endemic and dangerous loosening of the co2 cylinder with ***Cylinder Safe*** as risk is greatly reduced. ***Standard innovation across all lifejackets because it's too important not to be.***

*at the time of going to press



Speed

A brand new innovation and industry first; The revolutionary ***Rapid Buckle*** makes donning and removing the 3Dynamic effortless in any conditions.

innovation *as standard*

Three ways we redesigned the lifejacket

Recently we had a rethink. We focused our minds on what it means to work, to create and sell products. We understood why we do this, why our founders did it, and why we continue passionately today.

The simple answer is *friendships and adventure* - and we now understand this as the Seago Spirit.

This spirit helped us to redesign our core product, the life jacket, as a reflection of our true values.

Here are three of the groundbreaking new features which illustrate our rethink...

1. Buckles

Every lifejacket in the Seago range has been rethought to be safer, more comfortable and more convenient. Buckles are used at least twice every wear. We set out to make this experience virtually effortless in all conditions. The **Rapid Buckle** on the new 3Dynamic is 5X faster during in-house testing. On the Active range new Easy Fit & Release design dramatically speeds up the same process.

2. Cylinder safe

We set out to address one shocking fact about lifejacket cylinders: CO^2 cylinders can loosen when lifejackets are worn. Less than 100% secure cylinders can mean your lifejacket may not inflate putting your life in danger. For us, that's a problem you simply can't leave unaddressed. Fitted as standard to every lifejacket in our range is **Cylinder Safe**, a unique innovation which greatly reduces cylinder loosening.

3. S-lung

The **S Design** lung is about one thing only: increased safety in the water to prolong survival. A standard lung shape on traditional lifejackets allows water to flow along the centre channel towards the face adding to the risk of secondary drowning. This seems counterintuative to us, especially because adrenaline can cause users to breathe quickly. We invented the S Design lung to guide wash away from the wearer's mouth.

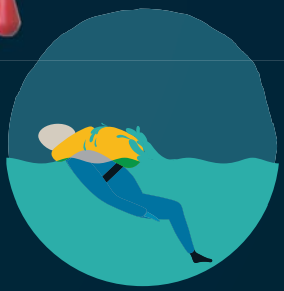
Seago's unique S Design lung also includes these features:

SDESIGN
WASH PROTECTION LUNG

- Unique wash redirection S Design
- Oral tube
- Light and whistle
- SOLAS reflective tape
- Cylinder Safe

EXCELLENT TURN SPEED

EXCELLENT BUOYANCY



S DESIGN LUNG TECHNOLOGY

3Dynamic

Seago's completely redesigned flagship lifejacket. Our design team have combined a range of new features in one lifejacket that ensures elite performance and safety, together with maximum comfort.

The ***3Dynamic*** incorporates innovative design and technology advances bringing to the world the Rapid Buckle, Cylinder Safe and S Design lung together with LED multi flash light, spray hood and pocket for your knife. This means everything our pro and enthusiast customers tell us they need is close at hand. The team is incredibly proud of the advanced design features that we believe make it a market forerunner. *Available as either 190 or 300.*

ISO 12402-3 ISO 12402-2

3D contour fit
Complete freedom of movement

Firing options
Pro Sensor or Hammar options

Double crutch strap
Fitted as standard

Full spec at back

Rapid release

Revolutionary in the true sense of the word, the redesigned 3Dynamic buckle makes everyday use effortless and time saving in all conditions

Superior buoyancy

If you need to inflate there's one simple fact, the higher the buoyancy the higher the free-board (mouth height from water line). 3Dynamic has superior buoyancy as standard.

Splash defence

We believe our responsibility doesn't stop with buoyancy. Our unique S Design lung configuration ensures wash is channelled away from the face. The spray hood ensures complete protection in choppy seas.

Cylinder Safe

Additional risk reduction of the co2 cylinder working loose as you wear your lifejacket. Seago introduce the new Cylinder Safe for peace of mind.

Water resistant pocket

Exclusive to the 3Dynamic the new lifejacket pocket is ideal for a knife.

Active
Active

Active

The new range of ***Active*** lifejackets from Seago have been designed to combine maximum comfort with outstanding performance. You won't know it's there until it's needed.

High volume buoyancy together with unique safety features make this jacket the first choice for those with safety and convenience in mind. The introduction of Cylinder Safe and S Design lung features demonstrate Seago's ongoing investment in safety innovation. The 3D contour design reduces the surface area in contact with your body making the lifejacket almost unnoticeable for both men and women.

Active ***Pro*** comes with spray hood, light and status window fitted as standard.

Cylinder Safe

With the potential to save lives the new Cylinder Safe valve minimises CO^2 leaking for 100% inflation. Every jacket should have one, so all ours do.

Easy fit & release

Lifejacker wearers tell us donning and removing lifejackets is time better spent on the water. We've sped up this process across the range.

S Design lung tech

S Design lung configuration ensures wash is channelled away from the wearer's face. Our research showed enthusiasts felt the standard lung needed remodelling.

Superior buoyancy
ISO 12402-2/3 approved and surpassed

WAVEGUARD
JUNIOR-150

WAVEGUARD JUNIOR-150

The new Seago ***Waveguard Junior*** lifejacket is a revelation in design, comfort and safety, incorporating the S Design lung and easy fit buckle as well as upgraded material.

The pro-sensor firing mechanism with viewing window as standard ensures you can visibly assess the status of your child's lifejacket. This, together with the cylinder safe fitted as standard, illustrates safety as Seago's first priority.

The lifejacket design features a neoprene collar to maximise comfort, with a high visibility lifejacket colour to ensure additional safety.

ISO 12402-3

Easy fit & release

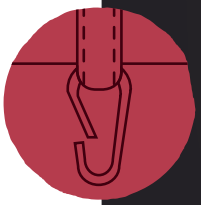
Customers tell us donning and removing lifejackets is time better spent on the water. We've made it much faster.

Status window

Our junior model comes with features parents and instructors tell us are essential, like the viewing window which lets guardians check on the lifejacket status at any time.

Maximum comfort

New to the junior lifejacket, incredibly soft neoprene material around the neck ensures the wearer is comfortable all day long.



Lightweight D-ring

High grade, abrasion-resistant polyester D-ring gives you a convenient way to safely clip your junior to the craft.

SEAGUARD 165

The versitile Seaguard 165 is an updated design of a popular lifejacket model that we have been selling for more than a decade.

The comfortable round neck design and its light weight combine to make this lifejacket one of our most favoured entry level models.

The abrasion resistant cover, together with newly designed buckle and lightweight d-ring makes the Seaguard 165 an all round lifejacket.

- Semi integrated lung
- Round neck design
- Lightweight

Options: Manual, Auto, Auto harness

Classic 190

The Classic 190 is Seago's longest selling lifejacket. For over 25 years it has stood the test of time, not only in design but also reliability, specification and performance.

The fixed lung design, makes our 'Classic' one of the markets easiest lifejackets to pack after inflation.

Our customers know that they can use, repack, and perhaps most importantly, feel confident in recommending the Classic 190 to friends and family.

- Integrated lung
- Square neck design
- Twin back strap

Options: Manual, Manual harness, Auto, Auto harness

HENRI LLOYD

#seagospirit

Without risk there is no adventure. But the best equipment minimises risk while expanding horizons.

This spirit lives in everything we do, design, make and maintain.

Our aim is to equip you as we would a friend, as many of our customers are, with what you need to be safe, in pursuit of your adventure. We seek the best of life — the near and nurtured coupled with the unknown and the horizon-expanding.

We are our customers' companion in this adventure. Mutual safety is our first priority.

Our equipment is meticulously designed and crafted to push the boundaries of sea safety - to go further, reach higher - and allow our customers to do the same.
